Mario,

When do you think you will know the solution. Apparently, your new Remote Monitoring Devices are not compatible with our lights.

Can we set up a call to discuss later this week? What is your availability?

Best regards,

Lorena Parker

Hi Lorena,

These Remote Monitoring Devices were indeed installed by our crews as part of a pilot program. The new devices are not compatible with your adapter and there was no way for our crews to reconnect your lights. We are working on a solution to be able to keep the new monitoring device in place and your lights powered up.

Please provide the exact location(s) of the pole(s) where Dekralite made the connection to power up your tivoli lights and our crews disconnected.

Regards,

Mario,

We did some additional research. Can you please see if you can assist us in finding out why all of the lights are out on 5th Street between Harbor Blvd. and Pacific Ave.?

Lorena

Attached are pictures of what we found on site Our TAPA unit disconnected and replace with a new units and we were unplugged.

Hopefully this helps find out what happened on site

Respectfully,

Subject: Request to evaluate the Tivoli Lights on Centre St.

George,

Last week, I was on the intersection of 5th Street and Centre Street and I noticed one of the strands dangling. It is located between 5th St. and 3rd St.

Can you please send a crew out there to assess the situation. When I previously made my request, I requested that your crew go to Centre St. between 5th and 6th Streets.

I checked with LADWP and they said that they haven't changed anything out. If your crew goes up there, it would be helpful to me if they can take some photods of the issue. I'm still trying to resolve this.

Thank you for your assistance.

Best regards,

Lorena Parker
